Implementation Strategies

Friends of Robotics

Thursday, 14th March 2013

10:25 Introduction & Course Presentation – de Cobelli

When&How to move ...

Chair: Vukotic, Holman

10:30 ...from Open to Lap Nephrectomy – Szkarlat

10:45 ...from Open to Lap Simple Prostatectomy – Mirandolino

11:00 ...from Lap to Robotic Surgery – Coman

11:15 ...from Robotic Prostatectomy to Robotic kidney surgery
Poulakis

11:30 ...from classic RALP to post-[...]-RALP
[post RT, post-HIFU, post-TURP, post-AMS 800-implant]
Kolombo

11:45 Discussion

12:30	IEO-Milan & UMF Cluj-Napoca Collaboration Agreement – Ceremony
-------	---

13:00 Friends Lunch

14:00-16:30 **Live Surgery**
Moderators: Kolombo, Tenke

OR 1 RALP Nerve Sparing – de Cobelli

OR 2 Sling Implant for Male Incontinence Virtue Coloplast – Bottero

16:30 Friends Coffee Break

Novel trends in ...

Chair: Szkarlat, Poulakis

17:00 ...robot assisted NSS – Matei

17:15 ...robot assisted RPLND – de Cobelli

17:30 ...robot assisted radical prostatectomy – Musi Petralia

17:45 ...robot assisted intracorporeal urinary diversion – Coman

18:00 Discussion

20.00 Friends Dinner

Friday, 15th March 2013

08:00-10:30 **Live Surgery**
Moderators: Poteko, Genadiev

OR 1 Coman Robotic Retroperitoneoscopy

OR 2 Matei Robotic NSS

10:30 Friends Coffee Break

Teaching Robotic Surgery ...

Chair: Mirandolino, Poulakis

11:00 ... indoor – Matei
11:20 ... outdoor – de Cobelli
11:40 ... teamwork – Lichosik
12:00 Discussion

12.30 Friends Lunch

13.30 Transfer to the
EAU Congress

*This meeting has been made possible thanks
to the generous support of*

Friends of Robotics

Dear Friend,

It's a great pleasure for us to present the "Friends of Robotics" to You. It was born out of the friendship between Ottavio de Cobelli, Deliu-Victor Matei (IEO Milan) and Ioan Coman, Nicolae Crisan (UMF Cluj-Napoca). This Friendship aims to promote an Eastern Europe Robotic Urology Sustain Strategy.

We met many of you in Cluj, last September, during that unforgettable and very challenging Event. Although there are still differences between Eastern and Western Europe as regards the health care status, we firmly believe that robotic surgery represents the future in the field of urology, for the whole of Europe. That's why we need to concentrate our efforts to sustain this natural process.

As you know, next march the Annual EAU Congress will be held in Milan.

We would like to invite you to attend in the Meeting of Robotic Urologic Surgery organized in the European Institute of Oncology one day before the official start of the Congress (i.e. on Thursday, the 14th of March) to discuss the progress made in robotic surgery, strategy of development and teaching of robotic surgery in our field.

Many of you have not yet had the opportunity to work with a robot. But you must be prepared, because the future is knocking at the door, and opening this door is a challenge.

The Meeting of Robotic Urologic Surgery will be held in the European Institute of Oncology in Milan and will be open to Eastern European urologists with the aim to highlight the potential that exists in this part of Europe.

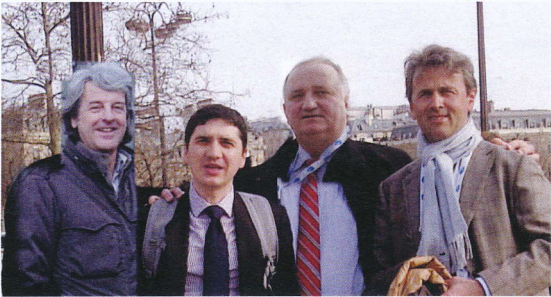

It is free of charge and You also welcome to bring with you one or two of your young urologists in order to introduce them to the urological surgery of the future.

Waiting to hear from you we send greetings and best wishes for a Happy New Year!

Ottavio de Cobelli
